

# The Ultimate Guide to a LIFE CHANGING Smile in Six Months

Who Else Wants STRAIGHT TEETH BEFORE SUMMER?

---

# THE ULTIMATE GUIDE TO A LIFE CHANGING SMILE IN SIX MONTHS

---

WHO ELSE WANTS STRAIGHT TEETH BEFORE SUMMER?

Have you ever had the experience of covering your mouth when you smile?

Maybe you made sure your lips were tightly pressed together when someone says... 'cheeeese'?

Perhaps you've felt embarrassed while looking at Facebook and seeing a photo of your teeth in comparison to someone else standing right next to you?

Have you thought about getting braces but have hesitated because of cost, length of treatment time, or even just worried about what people will say about you?

## Debra

Age: Early 50's

Occupation: Teacher

Chief Complaint: Crowding & Tooth Shape

Treatment Time: 5 Months

"I did not want to spend 2-3 years of my life with braces, not at this point in my life. I wanted to have straight teeth and I wanted them fast. It only took 5 ½ months for my straight teeth. Having straight teeth has changed my life tremendously. I'm now happy. People that I work with tell me how much happier I am now than what I was before and its only because I now have the confidence to smile..."

If this is you...then this report could ultimately open up new opportunities for you in business, relationships, and most importantly your self-esteem. I can say that confidently because I have literally witnessed people go from being NOTICEABLY shy, reserved, and self-conscious due to their teeth...to being NOTICEABLY engaging, personable and confident with their shining new smiles.

I wanted to create The Ultimate Guide to A LIFE CHANGING Smile in Six Months because I want you to know just how amazing this opportunity could be for you.

I had heard this from enough of these Six Month Smile patients (and experienced their newfound confidence) that I knew I had to create something to give future patients a little bit

Don't just take my word for it, listen to what our patients have to say about their Life Changing Six Month Smiles...

"I was so nervous about this that I nearly didn't do it. Doc, I had sooooo many questions that were hard to find, even online...and now that it's finished, I wish I would've done this sooner!"

more understanding of the process as they weren't finding it online. So...I've picked their brains and used their feedback to create "The Ultimate Guide to A LIFE CHANGING Smile in Six Months".

We at LuxeSMILE understand that choosing to have any sort of orthodontic work done is no 'quick decision'. We understand the concerns of money, time, and the 'what if this doesn't work out' type of concerns.

It's our goal in this report to provide you with solid answers to your questions (or at least a little more clarity) which leave you knowing what next step to take. After you've read it, if you have any questions at all please don't hesitate to give my office a ring. Rebecca at the front desk will make sure you feel comfortable getting whatever other answers you need.

*"It's amazing, this feels so much different. Wow like it's changed everything, in my mouth. My teeth were like crooked, my front teeth, and my tongue. I'd say that Luxe Smile is definitely worth it. Like I had to drive an hour, it's definitely worth the drive. And the outcome, it's worth it!"*

**LIFE IS SHORT.  
STOP HIDING YOUR SMILE**

## SO HOW DO YOU GET A LIFE CHANGING SMILE IN JUST SIX MONTHS?

Have you ever felt like this? "I just want to stop hiding my smile or I wish I could smile more but I am so embarrassed. "

So let's GO over why it's called a **SHORT TERM COSMETIC ORTHODONTIC SOLUTION**.

**Short Term:** Six months is the 'average' time frame for this process to work. This means you could start the New Year off with these babies and be ready by summer. Some cases are shorter (3-4 months) and a few are a little longer (6-9 months). Upon your initial consultation, we will have a fairly good idea of what time frame you should expect for your desired outcome.

*"It worked perfectly for me because I had a very short timeframe that I wanted to fit it in. I am getting married in November. I wanted to fix everything and I didn't want my crooked teeth in my wedding photos. It worked out perfectly it was 6 months and it was bing, bang, boom, done!"*

*I went to a lot of other consultations and they told me that it would take about 2 years tops to get them all done. And I just didn't want to wear braces that long again because I had them when I was a kid and they stayed on for over 2 years.*

*I would totally do it again. And I recommend it to anybody that wants to get it done!*

*Dr. Will and his team were so accommodating and they always made time for me in their schedule and they were super nice. The place is amazing, I had a great experience here, and I felt like home every time walking in."*

*It's the best thing I've done in the last 10 years of my life! I am confident, happy, more smiling - I'll be doing. I'm really glad I did it.*

**Cosmetic:** Six Month Smiles is strictly a cosmetic solution. What that means is that it primarily focuses on the teeth that show when you smile and does not correct any overbites, misalignments, etc. This is one of the secrets to how it is able to work so quickly. Most of those who qualify for Six Month Smiles don't desire a full traditional orthodontic scope of work done, but prefer a shorter timeframe to fix gaps/spaces, canine or fang teeth, etc.

**Orthodontic Solution:** This solution uses clear brackets and teeth colored wires so they are less noticeable than the normal metal braces. This is not invisalign which utilizes clear hard plastic trays that you take on and off to move your teeth at a much slower pace over 1 to 2 years typically.

**For Adults:** This is specifically for adults who want a noticeably straighter smile in less time.

## WHAT IS THE SIX MONTH SMILES PROCESS?

**No-Risk Initial Consultation:** You begin with a no-risk, free initial consultation where your dentist will examine your teeth and discuss your overall goals with you. Together you will discuss whether you qualify for Six Month Smiles and if it can help you achieve your goals. We will take photos of your teeth, upload them to an iPad and go over exactly how your teeth will move and determine a treatment goal time.

**Fitting:** If you are a good candidate we will custom order and design braces that will guide your teeth to straight in the shortest amount of time. On average, you'll return every 4 to 5 weeks to have adjustments done and any other minor alterations needed. Patients are shocked at how soon they experience noticeable movement in their teeth. These quick and noticeable movements (although still only minor at the beginning) provide assurance and confidence to the patient of the overall process and potential outcome of their smile.

**Keeping Clean:** As with any orthodontic treatment, throughout the process it will enhance your final outcome if you are thorough and consistent in keeping your teeth healthy and clean each day.

**Removal and Polishing:** After the 6 months is up, you will have everything removed and receive a whitening and polishing to leave you and your new smile sparkling with confidence.

**Retainer:** To maintain your new smile, you will have the choice to either use a removable or bonded retainer. The retainer acts as a support and assures that your new smile is here to stay.

### Kate

Age: Mid 20's

Occupation: Teacher

Chief Complaint:  
Crowding/Crooked Teeth, Front teeth pointing inward; slight overbite

Treatment Time: 7 Months

"I don't hide anymore, I smile. I don't even review pictures anymore. It makes you feel so much better when you can just go up to somebody and just smile. You don't have to think about your smile. That's what I grew up with was thinking about 'what do I look like right now'. I don't have to hide them anymore. It just makes you feel good..."

## FREQUENTLY ASKED QUESTIONS

### How noticeable are they?

This is a question we get a lot! Obviously it comes from people seeing others walking around with a mouthful of metal known as 'traditional braces'. Six Month Smiles really has gone above and beyond to make these braces as 'covert' as possible. We use clear brackets and teeth colored wires to help the braces blend in with your mouths natural color, similar to Invisalign clear hard trays.

*"I had 2 teeth, like one pushed back and one pushed forward. And it was like a hole. I would avoid smiling at points because of that spot.*

*I avoided braces for years and then I came here in August. And got them put on in August before I went to college for sophomore year. And I've had them on since, and about 6 months and 1 week I got them off.*

*I'm very happy with it!"*

### Can I afford this?

YES, absolutely. Can you afford to be unhappy with your smile for another day? Here at LuxeSMILE we will create a payment plan that meets your budget goals and we can even offer financing as low as \$100/month (the same cost as your cable bill essentially). The results you will see will be priceless once you can enjoy the smile you always wanted with your very own teeth.

### How do I know if it's right for me?

The easiest way to know if this is for you is to come in and have a risk-free consultation. I will sit down with you personally and we can find out quite quickly if Six Month Smiles is the right fit for you. If you are an adult, if you don't want to wear braces for 2 years, if you are you are unhappy or self-conscious with your smile than there is a very good chance this could be right for YOU.

### Is it painful?

Truth be told...it's not as bad as getting 'traditional braces' put on, but it's also not some 'pain free fairytale' process either. I would consider it to be a constant pressure that you will adapt and adjust to within the beginning weeks. The braces are moving your teeth in an unnatural way so it is expected to experience a little pain here and there. That said...we have had Six Month Smile patients from all age ranges and teeth situations who have not only completed their process, but who have also become avid Six Month Smiles advocates.

### Time:

Average time to create your new smile is 6 months but movement can begin nearly immediately.

# SMILE LIKE YOU MEAN IT.

## RISK FREE INITIAL CONSULTATION

So if you have read this far, we here at Luxe Smile Dentistry would like to offer you a **free consultation** to see if you'd qualify for Six Month Smiles. We know the feelings of both being nervous and excited at the thought of getting braces and finally having that confidence in your smile. We work with these emotions every day.

Many of the stories we hear have a similar theme to them in that they all have had all sorts of "reasons" for quite some time as to why they have not gotten braces. For many, these reasons have been that they don't have the money, or their life circumstances don't allow them to wear traditional braces for the entire two year timeframe, etc.

These same people were able to take advantage of the Six Month Smile opportunity and had their inner and outer self-image transformed. If you are ready to laugh, talk and smile with confidence then call us right now to schedule your free consultation. Just speak to our front desk assistant Rebecca at **781-319-0070** and she will get you all taken care of.

### Brennan

Age: Early 20's

Occupation: Sales

Chief Complaint: Spaces

Treatment Time: 5 Months

"When I was wearing the braces, people had no idea. They found out after I would have a full smile. I would literally have to show them and lift my lip up in order to prove to them that I actually had braces. I feel like I can lift my chin up a little higher just that little inch..."

Don't continue putting this off and living with something that is within your reach to fix! Nearly all of our Six Month Smile patients complain that they wish they would've done it sooner.

Your smile is waiting for you to call...

Committed To YOU SMILING MORE !!!

Dr. Burghardt

### Carrie

Age: Mid 30's

Occupation: Professor/Writer

Chief Complaint:

Crowded/Crooked Teeth; Teeth are different colors

Treatment Time: 6 Months

"It has changed my life. It really has. I'm a happy person, I'm a friendly person, and I'm a college professor so I'm in front of people all the time and I travel and give presentations. It allows me to be the outgoing person that I am..."

# YOUR SMILE SHOULD MAKE YOU HAPPY.

"Can I tell everyone how very, very, happy I am with my new smile? It was a little less than 3 years ago that we first started talking about Six Month Smile. You convinced me that I would see a huge improvement in my teeth in a short time. Considering I was 62, I questioned if it would be worth the money and time. Well, I have never looked back. I now have straight teeth and a beautiful smile and I am so happy with the results. I would recommend it to anyone, young or old. "

- Lois Hazen

P.S. We really do understand all the emotions and apprehension that comes with thinking about getting braces and committing to the orthodontic process. We know what it's like to weigh all the options as you move towards making the best decision for yourself and your future. During your FREE CONSULTATION we will not only listen to your dental goals, but we will be sincere with you in what to expect for your specific time frame and any other minor details that are important for you to know.
